Kort præsentation

Hi, my name is Yujia Liu. I am currently a PhD student in KU. My research focuses on the N₂O emissions from hotspots in Danish agricultural soils. The main objective of this project is the characterization and qualification of field scale fluxes in connection to plant growth and soil properties.

Ansættelse

Ph.d.-stipendiat
Geografi 1
Københavns Universitet
København K
1 okt. 2021 → nu

Researcher

Loop Biotech B.V.
Delft, Holland
1 nov. 2020 → 1 maj 2021

Kvalifikationer

Soil Biology, MSc., Wageningen University & Research
1 sep. 2018 → 28 aug. 2020
Resources and Environment, BSc., Northwest A&F University
1 sep. 2014 → 1 jul. 2018
